

Registering your cattle

1

Complete registration form and email to SPI registry samantha@pbbnz.com

Animals will be held in a pending status

2

Complete DNA application form and email to dna@pbbnz.com, the required paperwork will be emailed to you. Refer to your Countries DNA flowchart for further details

3

Allow 5-6 weeks for DNA results to be returned

4

Results loaded into the SPI system and reported to breeder via email by PBB DNA

5

Eligible animals will be registered on the SPI database and certificates issued by SPI registry

Key tips

Make sure donor dams & AI sires have their permits in place **PRIOR** to registering progeny.

Please allow up to 5-6 weeks for DNA to be processed, then 5-7 working days for eligible animals to be registered on the SPI database and certificates to be issued.
